Properties of waves

Waves
Paper 2 · Combined and Separate
12 questions

Cover the answers. Answer each question out loud or on paper, then check. Tick the ones you know. Learn the 5 starred (★) questions first.

	QUESTION	ANSWER	✓
1 ★	**This transverse wave is drawn against distance, at one instant. State what labels A to E show.** 	A: amplitude B: wavelength C: peak D: trough E: rest position	☐
2 ★	**Define wavelength.**	The distance from a point on one wave to the same point on the next.	☐
3 ★	**Define frequency.**	The number of waves passing a point each second.	☐
4 ★	**State the standard unit of frequency.**	Hertz (Hz)	☐
5 ★	**Define the period of a wave.**	The time for one complete wave to pass a point.	☐
6	**State the standard unit of period.**	Second (s)	☐
7	**In words, state the equation linking period and frequency.**	period = 1 ÷ frequency	☐
8	**In symbols, state the equation linking period and frequency.**	$T = 1 \div f$	☐
9	**State the equation linking wave speed, frequency and wavelength.**	wave speed = frequency × wavelength ($v = f \lambda$)	☐
10	**What is the amplitude of a wave?**	The maximum displacement of a point on the wave from its rest position.	☐

	QUESTION	ANSWER	✓
11	**What is wave speed?**	The speed at which the wave transfers energy through the medium.	☐
12	**Describe a method to measure the speed of sound in air.**	Time a sound over a measured distance, e.g. from a clap to an observer. Speed = distance ÷ time.	☐
