Reflection, absorption and transmission

Waves
Paper 2 · Separate Physics only
8 questions

Cover the answers. Answer each question out loud or on paper, then check. Tick the ones you know. Learn the 4 starred (★) questions first.

	QUESTION	ANSWER	✓
1	**Describe how light travels.**	In straight lines.	☐
2 ★	**Name the line drawn at 90° to a boundary where a wave meets it.**	The normal	☐
3	**State what happens to a wave that is transmitted at a boundary.**	It passes through the new material.	☐
4 ★	**State what happens to a wave that is absorbed at a boundary.**	Its energy is transferred to the material.	☐
5	**State what happens to a wave that is reflected at a boundary.**	It bounces back off the boundary.	☐
6	**Name a reflection of a sound wave.**	An echo	☐
7 ★	**State the law of reflection.**	The angle of incidence is equal to the angle of reflection.	☐
8 ★	**Name three things that can happen to a wave at a boundary.**	It can be reflected, absorbed or transmitted.	☐
