Acceleration and mass

Forces
Paper 2 · Combined and Separate
6 steps

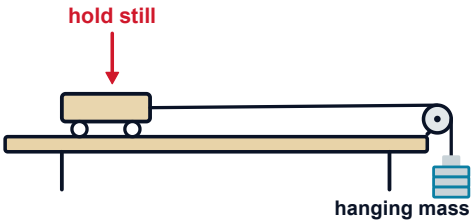

A student investigates how the mass of a trolley affects its acceleration.

1 Attach a string to a trolley and pass it over a pulley at the end of the bench.

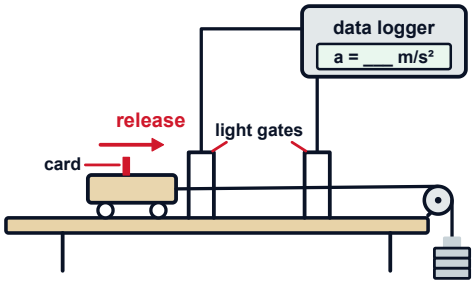

string over the pulley at the end of the bench

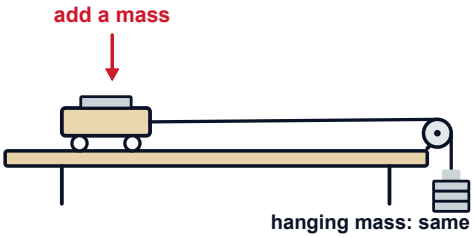

2 Hang a mass on the end of the string and hold the trolley still.

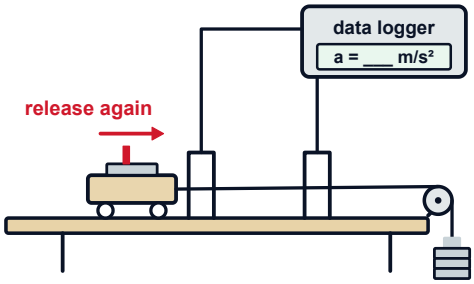

3 Release the trolley and record its acceleration using light gates.

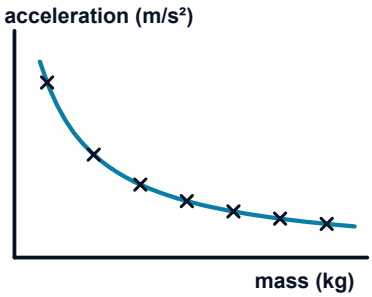

4 Add a mass to the trolley, keeping the hanging mass the same.

5 Release the trolley again and record the new acceleration.

6 Repeat for several masses and plot a graph of acceleration against mass.

acceleration against mass
