

Tables and graphs

Cover the answers. Answer each question out loud or on paper, then check. Tick the ones you know.

QUESTION		ANSWER	✓
1	State where the units should be written in a results table.	In the column headings.	☐
2	Name the type of graph used when the independent variable is continuous.	A line graph	☐
3	Name the type of graph used when the independent variable is categoric.	A bar chart	☐
4	State which variable decides the type of graph to draw.	The independent variable	☐
5	State which variable is plotted on the x-axis of a graph.	The independent variable	☐
6	State which variable is plotted on the y-axis of a graph.	The dependent variable	☐
7	State two things every axis of a graph must have.	A label (the quantity) and a unit	☐
8	Describe a good scale for the axis of a graph.	It uses most of the grid and goes up in equal, easy-to-read steps.	☐
9	State how the points on a line graph should be plotted.	As small crosses.	☐
10	Explain why the bars on a bar chart have gaps between them.	The categories are separate, with no values in between.	☐
11	State what is plotted on a graph: individual trials or means.	The means	☐
