

Changes of state

Cover the answers. Answer each question out loud or on paper, then check. Tick the ones you know.

	QUESTION	ANSWER	✓
1	Name the change of state from solid to gas.	Sublimation	☐
2	Name the change of state from gas to liquid.	Condensation	☐
3	Explain the difference between boiling and evaporation.	Boiling: only at the boiling point, throughout the liquid. Evaporation: at any temperature, from the surface only.	☐
4	Explain why mass is conserved during a change of state.	The number of particles stays the same.	☐
5	What is a physical change?	A change in which no new substance is made and that can be reversed.	☐
6	Are physical changes reversible?	Yes	☐
7	What is a chemical change?	A change in which new substances are made.	☐
8	Are chemical changes reversible?	Usually not	☐
9	Name the change of state from solid to liquid.	Melting	☐
10	Name the change of state from liquid to solid.	Freezing	☐
11	Name the two ways a liquid can change into a gas.	Boiling and evaporating	☐
12	A 50 g ice cube melts. State the mass of water formed.	50 g	☐
