Changes of state

Particle model of matter
Paper 1 · Combined and Separate
10 questions

Cover the answers. Answer each question out loud or on paper, then check. Tick the ones you know. Learn the 3 starred (★) questions first.

	QUESTION	ANSWER	✓
1	**Name the change of state from solid to gas.**	Sublimation	☐
2	**Name the change of state from gas to liquid.**	Condensation	☐
3 ★	**Explain the difference between boiling and evaporation.**	Boiling: only at the boiling point, throughout the liquid. Evaporation: at any temperature, from the surface only.	☐
4 ★	**Explain why mass is conserved during a change of state.**	The number of particles stays the same.	☐
5 ★	**What is a physical change?**	A change in which no new substance is made and that can be reversed.	☐
6	**Are physical changes reversible?**	Yes	☐
7	**Name the change of state from solid to liquid.**	Melting	☐
8	**Name the change of state from liquid to solid.**	Freezing	☐
9	**Name the two ways a liquid can change into a gas.**	Boiling and evaporating	☐
10	**A 50 g ice cube melts. State the mass of water formed.**	50 g	☐
